## Taste Test Science

### Materials:

- 4 cups of water
- Wooden tongue depressors
- Lemon Juice
- Salt
- Sugar
- A taste test subject!
- Note: Be aware of citrus allergies

### Instructions:

1. Dissolve sugar crystals into one cup, salt into another cup and pour lemon juice into a third cup.
2. Leave the fourth cup as a 'control', i.e. something you can compare against.
3. Mix a wooden ice-cream stick through one solution and place it on the tip of your tongue. Record the taste i.e salty, bitter, sweet, no taste. Wash your mouth out with pure water.
4. Now repeat steps 3 and 4 for the back, sides and middle of your tongue.
